

**AMENDMENTS TO THE CLAIMS:**

Please amend the claims as follows:

Claims 1-16. (canceled)

Claim 17. (original) An aerosol device comprising a vessel, which comprises:

(1) an aerosol composition, which provides a reshapable effect and comprises a liquid phase comprising at least one composition comprising heterogeneous (meth)acrylic copolymer particles, said particles being the same or different and comprising at least one (meth)acrylic copolymer comprising:

(a) units derived from at least one monomer chosen from (meth)acrylate esters of branched and straight chain alkyl alcohols,

(b) units derived from at least one monomer chosen from (meth)acrylate esters of saturated and unsaturated cyclic alcohols containing 6 to 20 carbon atoms,

(c) optional units derived from at least one monomer chosen from hydrophobic monomers, and

(d) optional units derived from at least one monomer other than said (a), (b), and (c) monomers,

wherein said composition provides a reshapable effect and a propellant, and  
(2) a dispenser.

Claims 18-36.(canceled)

Claim 37. (original) An aerosol device comprising a vessel, which comprises:

(1) an aerosol composition, which provides a reshapable effect and comprises a liquid phase comprising at least one composition comprising heterogeneous (meth)acrylic copolymer particles, said particles being the same or different and comprising at least one (meth)acrylic copolymer comprising:

(a) from about 10 to about 85 weight percent of units derived from at least one monomer chosen from (meth)acrylate esters of branched and straight chain alkyl alcohols,

(b) from about 5 to 70 weight percent of units derived from at least one monomer chosen from (meth)acrylate esters of saturated and unsaturated cyclic alcohols containing 6 to 20 carbon atoms,

(c) from 0 to about 20 weight percent of units derived from at least one monomer chosen from hydrophobic monomers, and

(d) from 0 to about 20 weight percent of units derived from at least one monomer other than said (a), (b), and (c) monomers,

wherein said composition provides a reshapable effect and a propellant, and

(2) a dispenser.

Claims 38-52. (canceled)

Claim 53. (original) An aerosol device comprising a vessel, which comprises:

(1) an aerosol composition, which provides a reshapable effect and comprises a liquid phase comprising at least one composition comprising heterogeneous (meth)acrylic copolymer particles, said particles being the same or different and comprising at least one (meth)acrylic copolymer comprising:

(a) from about 20 to about 80 weight percent of units derived from ethyl hexyl (meth)acrylate,

(b) from about 5 to about 65 weight percent of units derived from isobornyl (meth)acrylate, and

(c) from about 1 to about 15 weight percent of units derived from (meth)acrylic acid,

wherein the ratio of ethyl hexyl (meth)acrylate derived units to isobornyl (meth)acrylate derived units ranges from about 0.5:1 to about 6:1 and

wherein said composition provides a reshapable effect and a propellant, and

(2) a dispenser.

Claims 54-72. (canceled)

Claim 73. (original) An aerosol device comprising a vessel, which comprises:

(1) an aerosol composition, which provides a reshapable effect and comprises a liquid phase comprising at least one composition comprising heterogeneous (meth)acrylic copolymer particles, said particles being the same or different and comprising at least one (meth)acrylic copolymer comprising:

(a) optional units derived from at least one monomer chosen from (meth)acrylate esters of branched and straight alkyl alcohols,

(b) optional units derived from at least one monomer chosen from (meth)acrylate esters of saturated and unsaturated cyclic alcohols containing 6 to 20 carbon atoms,

(c) optional units derived from at least one monomer chosen from hydrophilic monomers, or

(d) optional units derived from at least one monomer other than said (a), (b), and (c) monomers,

wherein said at least one (meth)acrylic copolymer comprises at least one unit derived from monomers recited in either (a) or (b), and

wherein said composition provides a reshapable effect and a propellant, and

(2) a dispenser.

Claims 74-76. (canceled)
